Suzie Panek	Resource impact assessment lead	Present for items 1 - 7
Lee Yee Chong	Technical analyst	Present for items 1 - 7
Tamara Diaz	Project manager	Present for items 1 - 7

Apologies:

Stuart Ralston

1. Welcome and objectives for the meeting

The Chair welcomed the Committee members and attendees to the 24th Osteoporosis guideline committee meeting.

The Chair informed the Committee that apologies had been received from one committee member. This has been noted above.

The Chair outlined the objectives of this meeting: to hear the summarised feedback received from stakeholders during the recent public consultation on the draft guideline and redraft recommendations where relevant relating to:

- Risk factors
- Vertebral fracture assessment (VFA)
- Follow up for people not on treatment

2. Confirmation of matter under discussion, and declarations of interest

The Chair confirmed that, for the purpose of managing conflicts of interest, the matter under discussion is stated above in item 1. The Chair asked everyone to verbally declare any interests that had arisen since the last meeting. There were no new declarations.

The Chair, and a senior member of the Developer's team noted that previous declarations from Nicola Peel would require that she withdraw from all discussions related to vertebral fracture assessment.

3. NICE Quality Standards: Update

An update was provided on alignment of the Osteoporosis Quality Standard with the revised guideline recommendations.

Members were advised that the current exercise is primarily to ensure consistency between the quality standard and the updated guideline, with a fuller review anticipated in the future.

Publication of the aligned quality standard is expected alongside publication of the guideline.

4. Consultation comments and recommendation edits

The committee reviewed and refined the wording of the risk factors, vertebral fracture assessment (VFA) and follow up for people not on treatment recommendations, in response to consultation feedback.

5. MTA and other related projects

An update was provided on the Multiple Technology Appraisal (MTA). Committee members were advised that stakeholder comments on the draft MTA scope were due to be discussed at an upcoming scoping workshop attended by some committee members.

6. Communications: publications policy

The Chair reminded committee members that all existing confidentiality arrangements remained in force until publication of the guideline. Members were advised that if they received any media enquiries, they should refer these to NICE in the first instance rather than responding directly. The committee was informed that contact details for the NICE communications team, including out-of-hours contacts, would be circulated separately.

7. AOB

There being no further business the meeting ended at 4:00 p.m. The group was thanked for their contribution and support during their development of part 1 of the guideline.

Date and location of next meeting: No further meetings planned. This meeting marks the end of the development period for Part 1 of the Osteoporosis guideline.
